SAVITH NARAYAN S

Python Full-Stack Developer

savithnarayan111@gmail.com 9207018422 Chavakkad,thrissur LinkedIn

Profile

Python Full Stack Developer trainee with knowledge of front-end and back-end development. Skilled in Python, Django, HTML, CSS, JavaScript, and Postgres management. Quick learner with a strong interest in building web applications and improving coding skills

Professional Experience

07/2025 – Present
Thrissur

Python Full stack Developer Intern
Tron Digital

- Developed web applications using **Python and Django framework**.
- Designed responsive user interfaces using **HTML5, CSS3, Tailwind CSS, Bootstrap, and React**.
- Planned and consumed **REST APIs** for frontend–backend communication.
- Worked with **PostgreSQL database** for data storage and management.
- Used **Git and GitHub** for version control and project collaboration.
- Gained hands-on experience in **full-stack development lifecycle**

Skills

Languages
Python, Javascript, SQL

Web
HTML5, CSS, TailwindCSS, Bootstrap

Frameworks
Django, React, REST API Development

Database
PostgreSQL

Tools
Visual Studio, VS Code, Git, GitHub

Soft Skills
Problem Solving, Effective Communication, Time Management, Team Collaboration

Projects

04/2026 – 05/2026

Comfort Plus-Laundry Management Application
Python Full Stack Project

- Developed a full-stack Laundry Management Application using Django and React with separate Admin and User dashboards.
- Built a secure admin dashboard to manage users, laundry services, orders, payments, and delivery status.
- Implemented RESTful APIs using Django REST Framework and integrated JWT-based authentication for secure login and communication.
- Designed and managed the database using PostgreSQL for efficient data storage and retrieval.
- Integrated authentication and authorization features with role-based access control for Admin and User modules.
- Implemented order tracking and status update functionality to improve service management and user experience.
- Connected frontend and backend using REST APIs with efficient state handling and real-time data rendering.

01/2026 – 02/2026

Food Delivery App MVP

Python Full Stack Project

- Enhanced and maintained full-stack web applications using Python, Django, and Django REST Framework.
- Built RESTful APIs for user authentication, CRUD operations, and data management.
- Implemented authentication and authorization using JWT and token-based authentication.
- Created and integrated frontend components using HTML, CSS, JavaScript, and basic frontend frameworks.
- Worked with relational databases (MySQL / PostgreSQL) for data modeling, queries, and migrations.
- Tested APIs using tools like Postman and handled error debugging and performance optimization.
- Used Git and GitHub for version control, branching, and code collaboration.

09/2025 – 09/2025

Portfolio Website

Frontend Web Project

- Designed and improved a responsive portfolio website using HTML, CSS, and JavaScript.
- Executed clean and structured layouts to showcase projects, skills, and contact information.
- Used CSS Flexbox and Grid to ensure responsive design across desktop and mobile devices.
- Added interactive features using JavaScript for smooth navigation and user experience.
- Followed web accessibility and best UI/UX practices.
- Tools & Technologies: HTML, CSS, JavaScript

08/2024 – 03/2025

Mock Interview with AI (Academic Project)

- Created a web platform for automated mock interviews with roles such as Python Developer and HR.
- Implemented voice-to-text analysis to assess verbal responses.
- Included non-verbal evaluation (confidence, eye contact, head pose).
- Delivered real-time feedback and malpractice detection features.
- Technologies: Flask, HTML, CSS, JavaScript, Bootstrap, MySQL

Education

03/2025

BSC COMPUTER SCIENCE

University of Calicut

06/2022
